

Hi there!

Your flag windsock kit includes the following:

- **1 piece of white paper**
- **10 strips of red paper** (you will only need 9 for the project, but as they are thin, there's an extra, just in case!)
- **1 blue square**
- **12 white stars**
- **String**
- **A gluestick**

Some tape, a stapler or a hole punch would be helpful, but aren't necessary.

**Step 1:**

Glue the 9 red strips onto the white paper

(tip: put the glue on the white paper and place the red stripe onto it - the tissue paper is fragile!)

**Step 2:**

Glue the 12 stars on the blue square, in whatever pattern you want!

**Step 4:**

Glue the blue square with the stars onto the red & white striped paper, and let dry

**Step 5:**

Gently make a tube, with one end overlapping the other slightly. Glue, tape or staple the tube closed.

**Step 6:**

Attach red, white and blue streamers to the bottom, using tape or glue.

**Step 7:**

Punch 2 holes for the string. Slip the string through each hole and tie so you have a large loop to hang it from.

**Step 8:**

Hang up your windsock and enjoy!

If you're able to, please send us a photo of our completed windsock! Get creative with it - pose with it, hang it up - show us your Bixby smile!

You can email your photo to us, or post it to our instagram page [@bixby\\_library!](#)
